

1) At what time of day was the fire? (afternoon, nighttime, etc.)?

R = The fire was about three o'clock in the morning.

What was Mrs. de Waal doing when the fire started?

R = She was asleep in her cabin.

Where was her life jacket?

R = It was in her cabin.

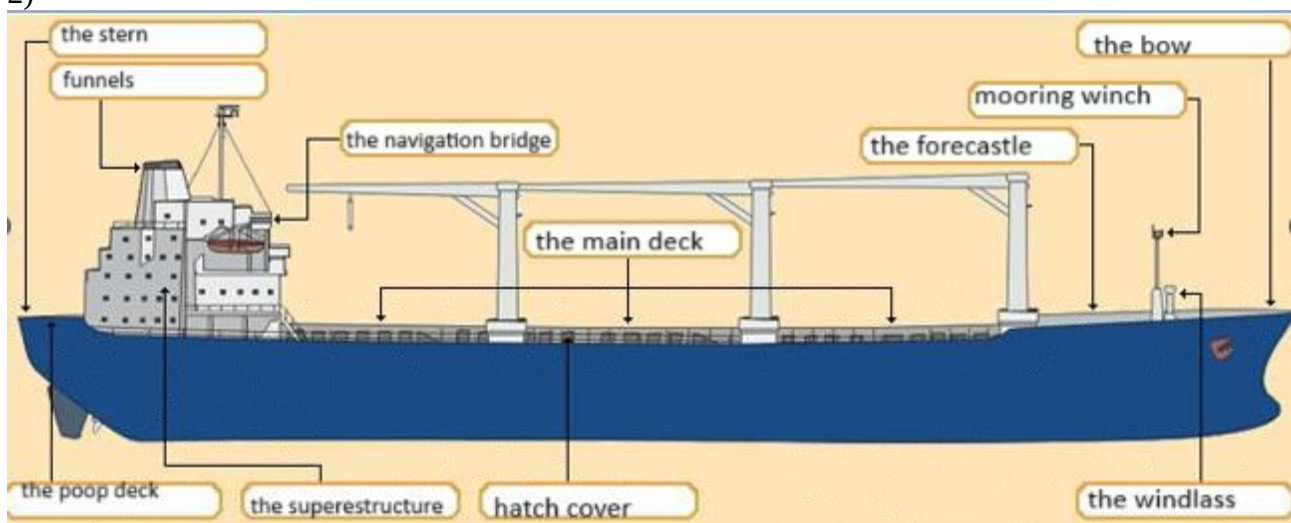

Why did she not know where to go?

R = Because there had been no drills.

Why did people jump overboard?

R = Because someone shouted "there are no lifeboats".

6) Mayday Mayday Mayday

This is Diana Diana Diana

Mayday

Diana, C6FO8

Position, Latitude 60° 07' North, Longitude 020° 09' East.

Taken water. People onboard rescue raft. Sea is rough.

I require Immediate assistance.

Over.

7) THE SECOND OFFICER

The Second Officer or Second Mate is, traditionally, the ship's navigational officer. I have to **ensure** that bridge electronics, navigational and alarm systems, and ship's lights are in good working order. I regularly **check** bridge instruments and **make sure** that up-to-date charts and navigational publications are available on board. I also **correct** the charts and **update** the navigational publications if necessary.

I **provide** the Master with information on transit routes to ports of call including the Sailing Directions, Coast Pilot, Light List and Tide and Current Tables and any other source of information that might be required before entering or leaving port. Finally, I **plot** the voyage track and **work out** the course. In the event of GPS failure I **take** terrestrial or celestial fixes for positioning. I **assist** the Captain in taking the ship in and out of ports. In addition to all this I am also the ship's medical officer.

- 8.1 - The windlass is aft of the bridge.
- 8.2 - Crews quarters are on the portside.
- 8.3 - Help me out in the galley please.
- 8.4 - Go through the hatchway and enter the deck.
- 8.5 - Report to the bridge now.
